Overview

PCGenesis requires that certain Windows® server environment variables be set to facilitate the correct operation of various system functions such as the installation of the periodic software releases. Setting these environment variables helps to identify the Operating System (OS) such as Windows® 2003 or Windows® 2008 to ensure the commands function correctly.

A2. Windows® 2003 PCGOS Environment Variables

Step	Action	
1	Select System Variables \rightarrow New.	
2	Enter the following information:	
	Variable: PCGOS	
	Value: 2K	

The following window displays:

New System Variab	e		<u>? x</u>
Variable <u>n</u> ame:	PCGOS		
Variable <u>v</u> alue:	2K		
		ОК	Cancel

Step	Action
3	Verify your information is the same as in the screenshot example above.
4	Click OK to save the entries.

Procedure B: Windows® 2008 Server Environment Variables

B1. Windows® 2008 PCGTYPE Environment Variables

Step	Action
1	Select Start, right-click on My Computer.
2	Select Properties \rightarrow Advanced System Settings \rightarrow Advanced \rightarrow Environment Variables \rightarrow System Variables \rightarrow New.

The following window displays:

New System Variable	<u>?×</u>
Variable <u>n</u> ame:	
Variable <u>v</u> alue:	
	OK Cancel

Step	Action
3	Enter the following information:
	Variable Name: PCGTYPE Variable Value: SV

New System Varia	able		<u>?</u> ×
Variable <u>n</u> ame:	PCGTYPE		
Variable <u>v</u> alue:	SV		
		ОК	Cancel

Step	Action
4	Verify your information is the same as in the screenshot example above.
5	Click OK to save your entries.
6	Proceed to <i>B2. Windows</i> ® 2008 <i>PCGOS Environment Variables</i> to repeat the procedures for <i>PCGOS</i> environment variables.
