PALS Reading
PALS Math

GCASE
Spring 2011
Non-Endorsement Statement

Neither the Georgia Department of Education nor the State of Georgia operates or controls in any respect to any information, products, materials or services that third parties may provide. Listing a particular product or posting of a link does not indicate Georgia Department of Education endorsement of that product or site.

We encourage our users to research each product themselves and to read the privacy statements of each and every site they visit.
Agenda

• Georgia POI/RTI
• Overview/Research on PALS Reading and Math
• Intro to PALS Math
• Intro to PALS Reading
• Iris Vanderbilt PALS-Reading Modules: Using technology to support SWD, ELL and struggling students
In 21st Century Education:

“We cannot continue to do the same things we have always done and expect different results”
Georgia’s Pyramid of Interventions is the overarching structure and framework for Response to Intervention

“...a process which aligns appropriate assessment with purposeful instruction for all students

(page 6, GaDOE RTI Guide)
## RTI National Approaches (NASP-Harn, 2007)

### Standard Protocol vs. Problem-Solving

<table>
<thead>
<tr>
<th></th>
<th>Standard Protocol</th>
<th>Problem-Solving</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Pros:</strong></td>
<td>Prevention/intervention oriented</td>
<td>Prevention/intervention oriented</td>
</tr>
<tr>
<td></td>
<td>Emphasis on SBRR</td>
<td>Emphasis on SBRR</td>
</tr>
<tr>
<td></td>
<td>Maybe easier for schools to implement</td>
<td>Individualized interventions</td>
</tr>
<tr>
<td></td>
<td>Problem defined as not responding to “package” intervention?</td>
<td><strong>Individualized interventions</strong></td>
</tr>
<tr>
<td></td>
<td>Prevention/intervention oriented</td>
<td>Links GE/Sped</td>
</tr>
<tr>
<td></td>
<td>Emphasis on SBRR</td>
<td>Responsive to learner performance—focus on instruction not the learner</td>
</tr>
<tr>
<td></td>
<td>Maybe easier for schools to implement</td>
<td>Adequate response?</td>
</tr>
<tr>
<td></td>
<td>Definition of a problem is unclear?</td>
<td>Intervention needs to be proportional to the difficulty</td>
</tr>
</tbody>
</table>

### Cons:

- Problem defined as not responding to “package” intervention?
- Fidelity of implementation is key?
- Dependent on selection of “right” package?
- Definition of a problem is unclear?
- What is adequate response?
- Intervention needs to be proportional to the difficulty?
Key elements
Georgia Pyramid of Interventions (SSTAGE, 2010)

**Standards-Based Classroom Learning**: All students participate in general education learning that includes implementation of the GPS through research-based practices, through use of differentiation of instruction such as flexible grouping, varied instructional strategies and progress monitoring of learning through multiple formative assessment and analysis of student work. Positive Behavioral Interventions and Supports.

**SST-Driven Learning**: In addition to Tier 1 and Tier 2 and different by including individualized assessments, formal progress monitoring, interventions tailored to individual needs, referral for specially-designed instruction if needed.

**Needs-Based Learning**: In addition to Tier 1 and different by including specialized pyramids of intervention, greater frequency of progress monitoring of learning through multiple formative assessment and analysis of student work.

**Specially-Designed Learning**: GPS access/extension, greater frequency of progress monitoring, specialized programs, methodology or instructional delivery.

---

[Diagram showing the Georgia Pyramid of Interventions with Tier 1, Tier 2, Tier 3, and Tier 4, each with arrows pointing to the next tier.]
Focus on the **individual** student

- Hypothesis-driven
- Diagnostic assessment and in-depth analysis
- Intervention matched to specific needs of the student
- Infuses diverse expertise

Focus on **groups** of students

- Common assessments and screening (automatic triggers)
- Standards-based preplanned interventions

*(Pennington, 2009-SSTAGE)*
Tier 1 is the foundation of the Pyramid. Strengthening Tier 1 academic and behavioral supports is vital to the success at all other Tiers.

- Implement R-B strategies beginning with Tier 1
- Classroom management; Differentiation
- Common Core GPS
- Teaching core foundational skills in reading, math, behavior
- Ongoing formative assessment
- Provide coaching, consultation, feedback
Pretest-Insert & Rank Order List:

Discussion

Practice by Doing

Lecture

Auditory/Visual

Teaching Others

Demonstration

Reading to Them

(Ram, 1960, LLC 1999, PENT-Browning-Wright, 2005)
Learning Pyramid

- Lecture: 5%
- Reading: 10%
- Audio-Visual: 20%
- Demonstration: 30%
- Discussion Group: 50%
- Practice by Doing: 75%
- Teach Others/Immediate Use: 90%

What activities do teachers use during instruction?

1. Lecture/read
2. Give directions
3. Listening
4. Ask questions
5. Monitor
6. Model
7. Verbal rehearsal
8. Simulate enhancer
9. Advance organizer
10. Role Play
11. Content Enhancement (complex)
12. Elaborated Feedback
13. Write on board
14. Describe skill/strategy

(Hock, 2009; Schumaker, et al., 2002; 2005)
(Hock, 2009; Schumaker, et al., 2002; 2005)
Tier 1 Standards Based Classroom

• Sound differentiated classroom instruction
  Teaching and Learning

• Data that drives instruction

• CCGPS/Performance Tasks, Peer Assisted Learning, Cooperative Learning:
  research-based practices in the retention of learning:
  • Discussion
  • Practice by Doing
  • Teaching Others

PALS is one example of these practices
There is a great deal of confusing language being used to ‘qualify’ strategies, interventions, programs and practices

Which is which?

• Strategies

• Interventions:
  – Scientifically-Based
  – Research-Based
  – Evidence-Based
Strategies

• Definition of Strategy
  – A loosely defined collective term that is often used interchangeably with the word “intervention”; however strategies are generally considered effective instructional and behavioral practices rather than a set of prescribed instructional procedures, systematically implemented. (GaDOE RTI Guidance)
Interventions are NOT...

(John McCook, 2006)

• Preferential seating
• Shortened assignments
• Parent contacts
• Classroom observations
• Suspension
• Doing MORE of the same
• Retention
• Peer helpers (informal)
NCLB Defines Scientifically Based Reading Research as:

- (A) applies rigorous, systematic, and objective procedures to obtain valid knowledge relevant to reading development, reading instruction, and reading difficulties; and
- (B) includes research that:
  - (i) employs **systematic, empirical methods** that draw on observation or experiment;
  - (ii) involves **rigorous data analyses** that are adequate to test the stated hypotheses and justify the general conclusions drawn;
  - (iii) relies on measurements or observational methods that provide **valid data across evaluators and observers and across multiple measurements and observations**; and
  - (iv) has been **accepted by a peer-reviewed journal** or approved by a **panel of independent experts** through a comparably rigorous, objective, and scientific review.  

*(20 U. S. C. § 6368(6))*
Interventions

• Definition of an intervention
  – Targeted instruction that is based on student needs.
  – Interventions supplement the general education curriculum.
  – Interventions are a systematic compilation of well researched or evidence-based specific instructional strategies and techniques. (GaDOE RTI Guidance)
Interventions should ...

- Be **connected to a specific goal** that is well-defined, observable and measurable.

- Have specific, defined, *step-by-step descriptions* so they can be:
  - Implemented consistently
  - Can be replicated and researched

- Include ongoing data, **progress monitoring** of the student’s response to the intervention

(Freer-SSTAGE, 2008)
Peer Assisted Learning Strategies is a type of classwide peer tutoring that is used to improve reading and math skills.

- Teachers pair lower and high performing students, and the partners work on different activities that address the skills that are causing problems.
- The pairs are changed regularly, giving all students the opportunity to act as coaches and players.

PALS enables teachers to address individual student needs, as well as observe students and develop individual remedial lessons.

- It is a complementary intervention that teachers can use to augment their existing reading and math curricula.
- PALS is composed of 25-35 minute activities that are implemented 2-4 times a week.
PALS Research

(Fuchs & Fuchs, retrieved March, 2011)

- Based on Juniper Gardens Classwide Peer Tutoring model
- More than 15 years of experimental research
- Title I and non-Title I schools
- Urban and suburban schools
- High, average, and low achievers
- SWD, struggling students, ELL students

- “Validated Practice” status from U.S. Department of Education
- Validated in reading (preschool through grade 6 and high school)
- Validated in math (kindergarten through grade 6)
- All students in a class are paired, so that higher and lower performing students work on highly structured activities.

(Fuchs & Fuchs, retrieved March, 2011)
PALS Research

- Best Practice status by US Dept Ed Program Effectiveness Panel for PALS Math and PALS Reading for inclusion in National Diffusion Network

- PALS Reading has been noted to show positive results on What Works Clearinghouse research website

- PALS Math is listed among best evidence-supported math programs on the John Hopkins University website, Best Evidence Encyclopedias (BEE).

- A body of research studies using experimental and quasi-experimental have shown positive outcomes in using PALS Reading and PALS Math with different student groups (ELL, SWD, struggling general education students)
NICHCY Math Research

5 meta-analyses reviewing over 183 research studies on students with disabilities (Steedly et. Al., 2008; Evidence for Education 2008). http://research.nichcy.org/Evidence_TOC.asp

Four approaches that improve results and show the most promise:

• Systematic and Explicit Instruction
• Self-instruction
• Peer Tutoring
• Visual Representation
Research: Peer Tutoring Effectiveness

• Research shows that a variety of peer-tutoring intervention programs are effective in teaching math:
  – Classwide Peer Tutoring (CWPT)
  – Peer Assisted Learning Strategies (PALS)
  – Reciprocal Peer Tutoring (RPT)
Structured Peer Tutoring Intervention

- Minimum of 30 minutes, 2 times per week
- May be used more frequently, depending on student needs

- Teachers are “managers” of the intervention
- Encouraged to assist students in making math connections
- Students move past concepts and questions into conceptual knowledge by using
  - Real life examples
  - Discussing meaning and answers to problems
  - Use of manipulative(s) or concrete representations
Two Parts to Gr 2-6 PALS Math Lessons:

**Coaching: 15-20 minutes**
- Each of the partners work on math problems in a specific area
- The coach questions the player in order to guide the activity
- Coach has been trained on how to provide feedback

**Practice: 5-10 minutes**
- Students do independent practice worksheet with mix of difficult and less challenging problems
- Students exchange papers and score them
- Students earn points based on cooperation, explanations and accuracy
Math PALS Manuals

Each teacher needs a Teacher Manual and a Student Manual

• The Teacher Manual is for all teachers (blue)
• The Student Manual (at each grade) has the templates for copies
  • Grade 2 (yellow)
  • Grade 3 (red)
  • Grade 4 (green)
  • Grade 5 (purple)
  • Grade 6 (orange)
Math PALS Lessons

- Each Student Manual contains:
  - Computation lessons
    - Easiest to hardest
  - Applications lessons
    - Alphabetical order

- Teachers choose which lessons to use
  - Concurrent with curriculum
  - Review
Math PALS Lessons

- Two ways to do lessons:
  - All students in class work on same lesson
  - Pairs work on different lessons
    - Focus skill should help lower-performing student in pair
Math PALS Basics

- There are 2 PALS sessions each week
- A lesson lasts two weeks (Days 1 & 2, 3 & 4)
- Students are self-sufficient when doing PALS, but teacher facilitates to ensure the effectiveness of each pair
- Students are paired together
  - One student starts as Coach and one as Player – students switch roles halfway through Coaching part of lesson
During each PALS session:

- Coaching (15-20 minutes)
  - Coach leads Player through half of Coaching Sheet
  - Coach and Player switch jobs
  - New Coach leads new Player through rest of Coaching Sheet
  - Students earn teacher-awarded points

- Practice (10 minutes)
  - Every student completes Practice Sheet individually
  - Paired students grade each other’s Practice Sheet
  - Students earn points for correct answers
Materials

- PALS folders
  - Each pair receives two folders:
    - Coach folder
    - Player folder
  - Folders are stuffed for a two-week lesson (Days 1, 2, 3, 4 of a lesson)
Skills Sequence
Grade 6

Math Methods for Grades 2-6
2009 Revised Edition

Lynn S. Fuchs, Douglas Fuchs,
Kathy Kamps, Norris Phillips

Support for the development of this manual was provided in part by Grant #180E2004 from the Office of Special Education Programs in the U.S. Department of Education, and Core Grant # HD15052 from the National Institute of Child Health and Human Development.
Adding Fractions With Like Denominators

Coach's Question Sheet

1. Read the problem aloud.
2. Rewrite the problem, vertically, in the space below the first fraction.
3. Do you need to add or subtract the fractions?
4. Add the fractions.
5. Add the whole numbers if there are whole numbers in the problem.
6. Do you need to rename the fraction? If yes, do it. (If you need help, see Renaming Hint below)
7. Add renamed fraction to the whole number if there is a whole number.
8. Do you need to reduce your fraction to lowest terms? If yes, do it.
9. Write you answer in the circle.

Hint for Renaming When Adding
Is the numerator of the fraction less than, equal to, or greater than the denominator?
If LESS THAN, you do not need to rename the fraction.
If EQUAL TO, the fraction equals 1.
EXAMPLE: \( \frac{3}{3} = 1 \)
If GREATER THAN, divide the numerator by the denominator. The quotient becomes a whole number, the remainder becomes the numerator, and the divisor remains the denominator. This number is your renamed fraction.
EXAMPLE: \( \frac{9}{7} = 1 \frac{2}{7} \)
Applications Lesson
Grade 6

Variables
Coach's Question Sheet

1. Read the problem.
2. What is the first thing you need to find out?
3. Find the correct answer and point to it. (If you need help, see Hint box below.)
4. Write the LETTER that is next to the correct answer in the blank.
5. What is the next thing you need to find out?
6. Replace the variable with the number.
7. Do you need to add, subtract, multiply, or divide? Do it.
8. Write your answer in the blank.

Hint for Variables
Sum refers to addition.
Difference refers to subtraction.
Product refers to multiplication.
Divided by refers to division.

Write the answers in the blanks.
Which expression matches the phrase: 36 divided by x?
(A) \( \frac{36}{x} \)
(B) 36 + x
(C) \( \frac{x}{36} \)
If \( x = 9 \), then the value of the expression is ______.

Which expression matches the phrase: The sum of y and 12?
(A) \( y \times 12 \)
(B) \( 12 \)
(C) \( y + 12 \)
If \( y = 38 \), then the value of the expression is ______.

Which expression matches the phrase: The difference between \( x \) and 26?
(A) \( x - 26 \)
(B) \( x \times 26 \)
(C) \( x + 26 \)
If \( x = 44 \), then the value of the expression is ______.

Which expression matches the phrase: y divided by 11?
(A) \( \frac{y}{11} \)
(B) \( y \times 11 \)
(C) \( 11 \)
If \( y = 33 \), then the value of the expression is ______.

Which expression matches the phrase: The sum of 31 and \( x \)?
(A) \( 31 - x \)
(B) \( 31 + x \)
(C) \( x \)
If \( x = 11 \), then the value of the expression is ______.

Which expression matches the phrase: The difference between 47 and \( x \)?
(A) \( 47 \times x \)
(B) \( 47 - x \)
(C) \( 47 + x \)
If \( x = 29 \), then the value of the expression is ______.

Player's Name __________________________
Coach's Name __________________________
Date __________________________

Dr. John D. Barge, State School Superintendent
How to assign PALS pairs

- Different ways to pair students (pages 23-24)
- Students are paired by the teacher
- Higher-performing students are paired with lower-performing students
- The higher-performing student is the Coach first
  - Students switch roles when they finish two rows (Computation) or when signaled on their gameboards by a flag (Applications)
PALS Timeline

- **Training**
  - Teacher trains using the simplest addition Computation
  
  - **Weeks 1-2**
    - 2 sessions per week, only Computation PALS
  
  - **Weeks 3-4**
    - Teacher trains on helping and explaining
    - Continue with Computation PALS
  
  - **Weeks 5-8**
    - Teacher trains on strategies for giving mathematical explanations
    - Continue with Computation PALS
  
  - **Weeks 9-30**
    - Teacher trains on Applications problem types
    - Continue with PALS, teacher can assign both Computation and Applications content for PALS
Training Students for PALS

- Training for PALS is 5 sessions

**Teacher Explains:**

- What is PALS? (Session 1)
- Role of Coach (Session 2)
  - How to lead activity and provide feedback
  - How to earn points
- Finishing Coaching (Session 3)
  - How to correct and narrate work
- How to complete Practice Sheets (Session 4)

- Session 5 is first session of new lesson
  - First time pairs do a full PALS lesson together
Helping and Explaining

- **Emphasis for Players:**
  - Ask the Coach for help
  - Keep asking until you understand

- **Emphasis for Coaches:**
  - Ask the Player if they need help
  - Ask the Player to explain something back to you
When you need help

Ask for help.

Keep asking until you understand.

Good explanations...

Help players learn something new.

Help coaches understand something better!

When you give help

1. Pay careful attention to your partner.
2. If you think your partner needs help, offer to help.
3. Don’t just give the answer. Explain how you partner can find the answer.
4. Ask questions that begin with what, where, when, how, and why to help your partner think about what the problem means.
5. If one explanation doesn’t help, try another one.
6. If you have trouble explaining, ask your teacher for help.
7. Ask your partner to explain to back to you to find out if he/she really understands.
Giving Mathematical Explanations

- Teacher trains students on strategies to help with PALS
  - Lesson 1 - Real-life examples (video clip 3)
  - Lesson 2 - Discuss the meaning (video clip 4)
  - Lesson 3 - Make marks (video clip 5)
  - Lesson 4 - Use manipulatives (video clip 6)
  - Lesson 5 - Review (video clip 7)
- There are five scripts, but two can be used in one session to keep up with PALS time
- Scripts start on page 71
MATH STRATEGIES

1. Use Real-Life Examples

2. Discuss the Meaning

\[ \underline{9} \quad 4 + 3 = \underline{32} \]

3. Make Marks

4. Use Manipulatives
Math PALS Best Practices

- Use a timer during PALS, this will keep sessions to 30 minutes
  - Coaching (first Coach) 7-10 minutes
  - Coaching (second Coach) 7-10 minutes
  - Practice Sheet 5 minutes
  - Wrap-up 5 minutes
Math PALS Fidelity

- To check how well PALS is implemented, Fidelity Checklists can be used.

- Fidelity Checks on:
  - At lesson beginning – teacher behaviors
  - During Coaching – teacher behaviors and 3 students pairs behavior
  - During Practice – teacher and student behaviors
  - At lesson end – teacher and student behaviors
http://iris.peabody.vanderbilt.edu/math/math_07.html
Important Features of Math PALS

- Reciprocal roles (Coaches and Players)
- Structured activities
- Individualized
- More time engaged on task
- Includes all students
- Opportunities for success for all students
- Encourages positive peer interactions
- Practical and effective
- Opportunities to monitor student progress

McGlinchey, Miblisi, r. March, 2011
PALS Reading

1. Partner Reading
   11–12 minutes

2. Paragraph Shrinking
   10 minutes

3. Prediction Relay
   10 minutes
Pairs: Coaches and Players

• Higher performing readers are paired with lower performing readers

• Coach
  - Provides prompts and helps Reader; takes turn reading

• Player
  - Reads and accepts help from Coach; takes turn helping

• Partners remain the same for 4 weeks

McGlinchey, Miblisi, r. March, 2011
PALS Reading Gr 2-6 Three Activities: First Is Partner Reading

Partner reading is conducted for 11–12 minutes.

Stronger reader reads aloud for 5 minutes.

Weaker reader reads same text aloud for 5 minutes.

Weaker reader retells story for 1–2 minutes.

Readers read quickly, correctly, and with expression.

Coach listens, corrects mistakes, and marks points.

Roles are switched, and steps are repeated.
Paragraph shrinking is conducted for 10 minutes.

• Stronger reader reads new text aloud for 5 minutes, summarizing each paragraph:
  – Names the most important who or what.
  – Names the most important thing about the who or what.
  – Shrinks the paragraph to 10 or fewer words.

• Weaker reader reads new text aloud for 5 minutes, summarizing each paragraph.

• Coach listens, corrects mistakes, and marks points.
• Roles are switched, and steps are repeated.
Three Activities at Grades 2–6: Third Is Prediction Relay

Prediction relay is conducted for 10 minutes.

• Stronger reader
  – Reads one half page aloud.
  – Makes prediction.
  – Reads half page.
  – Checks prediction.
  – States main idea.
  – Makes new prediction.
  – Continues reading next half page and repeats.

• Coach listens, corrects errors, and marks points.
• Roles are switched, and steps are repeated on next text.
Common Principles of Small-Group Validated Tutoring

- Point system is used to motivate students.
- Corrective feedback is immediate.
- Students master content before moving on to more difficult activities.

- Tutors are trained to implement tutoring with high level of fidelity:
  - Practice with other tutors and non-tutored students
  - Meet weekly to problem solve and share ideas
Teacher Monitoring

• Teacher keeps time and gives directions to students for moving from activity to activity.

• During activities, teacher walks around room:
  – assists students and listens to students read,
  – listens for fluency,
  – gives feedback,
  – awards points for correct implementation and positive behaviors/cooperation.

McGlinchey, Mblisi, r. March, 2011
Teams and Reward Structure

• Pairs keep point sheets.

• Teacher tallies points accumulated by pairs for each team weekly.

• Teacher announces first- and second-place teams each week, and students clap for public recognition.
High School PALS

- HS PALS is focused more on remediation
- Conduct PALS every other day, 35 – 40 minutes per session
- Conduct PALS at a regularly scheduled time
- SUPPLEMENT to regular reading program
- Your other teacher-directed reading instruction should cover reading objectives not covered during PALS
HS PALS

• Relies on the same dyadic structure, and the same three activities (Partner Reading, Paragraph Shrinking, and Prediction Relay) as PALS for grades 2-6.

• The motivational system was modified for older students, focusing on a "work" theme.
  – Instead of earning points as in PALS for elementary students, high schools students earn PALS "dollars" that are redeemed for tangible rewards.
While elementary PALS students use fictional readings, high school PALS students also read expository text. Teachers are encouraged to select reading material that is perceived by students as useful, including informational texts about employment opportunities, life skills, and social relationships.

Unlike other versions of PALS that are intended to be primarily implemented in the inclusive general education setting, PALS for high school students has typically been used by special educators and remedial reading teachers for students with more significant reading problems.
• Six Training Lessons

• Goal of these Training Lessons: to train your students to do PALS independently

• Each of the Training Lessons contains an outline and a script
HS PALS

Introduction

• Lesson 1: Learning about PALS
• Lesson 2: Partner Reading
• Lesson 3: Paragraph Shrinking
• Lesson 4: Prediction Relay
• Lesson 5: Check Writing
• Lesson 6: Reading for Information
PALS TA: Iris Vanderbilt Website

STAR Legacy Module

- Challenge
- Thoughts
- Perspectives & Resources
- Assessment
- Wrap Up
PALS TA: Iris Vanderbilt Website
How to Use a Module

• IRIS STAR Legacy Modules are Web-based instructional materials that provide information about working with students with disabilities. Each interactive module is made up of five components:

• **Challenge** – a realistic scenario relevant to education professionals

• **Initial Thoughts** – questions that allow students to explore and consider what they currently know about the scenario presented in the Challenge

• **Perspectives and Resources** – nuggets of information (e.g., text, movies, audio interviews, activities) that allow students to actively engage in learning the module's main content

• **Assessment** – an evaluation tool that offers students the opportunity to apply what they know and to evaluate what topics they need to study further

• **Wrap Up** – a summary of the information presented in the previous components
PALS TA: Iris Vanderbilt Website
http://iris.peabody.vanderbilt.edu/

Gr 2-6 Reading PALS
http://iris.peabody.vanderbilt.edu/pals26/cycle.htm

HS PALS Module
http://iris.peabody.vanderbilt.edu/palshs/cycle.htm
PALS on Iris

Once on the Iris website:

♫ On left hand menu- go to the “Reading, Literacy Language Arts” Tab

♫ Then to right menu and click on “Modules”

♫ Click on PALS (K-1, Gr 2-6 or HS)
Iris Vanderbilt

STAR Legacy Modules

• Powerful way to provide low cost, free TA and PL for your district/schools

• Helps to redeliver PL/TA support for PALS Reading

• Important to follow website outline, suggestions, and assignment tips

• Working in teams, collaborating with others, and providing coaching supports are the keys to success
