

## Georgia Transition From Part C to Part B

Child was referred to BCW *greater than* 90 days, but BCW refers to LEA *less than* 90 days

Transition Conference is held

LEA secures parental permission to evaluate

LEA evaluates, determines eligibility, develops IEP, & implements on or before 3rd birthday.

**NOTE: LEA is responsible for meeting this timeline. If evaluations, eligibility determinations, IEP development, & implementation is not achieved by 3rd birthday, it counts against LEA.**

Data is reported under indicators B11 and B12

B11 is the State Performance Plan (SPP) indicator that measures the timeliness of initial evaluations to determine if a child is a child with a disability.

B12 is the SPP indicator that measures the percent of children referred from Part C who had an evaluation and eligibility determined and an IEP developed and implemented by age 3.
