NOTE: The table in Appendix A is used for age validation purposes only. This table does not have any relation to age ranges or limitations for program requirements, and should not be used to determine whether a student should be promoted or retained based on age. The table was developed to establish boundaries for error checking as it relates to individual student age. EX: These ranges would prevent a 6-year-old student from being reported as a high school graduate. Another example of how this table is used is to prevent a 9-year-old student from being reported as withdrawing to enlist in the military.
