Myinfinitec.org Autism Resources

1

1. Autism is the fastest growing diagnosis category in pediatrics and many districts are struggling to keep abreast of the current information related to the disorder. Here's how districts can benefit from the resources at myInfinitec.com.
2. The Online Classroom videos empower educators by teaching them how to adapt the Four Block Model for teaching children with severe disabilities. Other topics included address the three areas of concern - behavior, communication and social interaction.
3. Training Materials provide teachers instant access to usable templates for writing, self-behavior evaluation visual aids and help for students who have difficulty transitioning.
4. Downloads has Smart Sheets that provide information on specific technology that can benefit children with autism. If teachers need help modifying curriculum for different levels there are Universal Design Guides for all grade levels. Other premade activities support writing on popular educational software titles.
